

1 Fold an A4 sheet of paper in half lengthways. Open it out again. There'll be a crease in the centre.

2 Fold the top corners diagonally down towards the crease.

3 Fold the right hand corner down to the crease, about 45mm below the first turnover. Do the same to the left corner.

4 Now fold the sheet in half lengthwise, with the flaps on the outside.

5 Finally, fold down the wings at an angle so that they rise up at the rear of the plane (as shown). Now you are ready to fly!
